“ Hi, my name is Juan Ubiera. I want to start a World Transformation Movement Centre in New York. I've lived in New York for the last 30 years or so; I'm originally from the Dominican Republic. I think it's very necessary for people to know this information. It's world-saving information. And I need everybody to have access to this wonderful information.

When I became aware of this good news, I kept reading and it's wonderful! This information is definitely changing the world. When it's spread out, I'm sure that we're going to go back to our original selves.

I came to the United States 30-something years ago after studying at the Conservatory of Music in my original country, the Dominican Republic. Here in the States, I did my Bachelor's in Musical Performance, then I did a Master's degree in Music Education and this is what I've been doing for the last 10 years, teaching music. I founded the Domisol Music Academy in 2012.

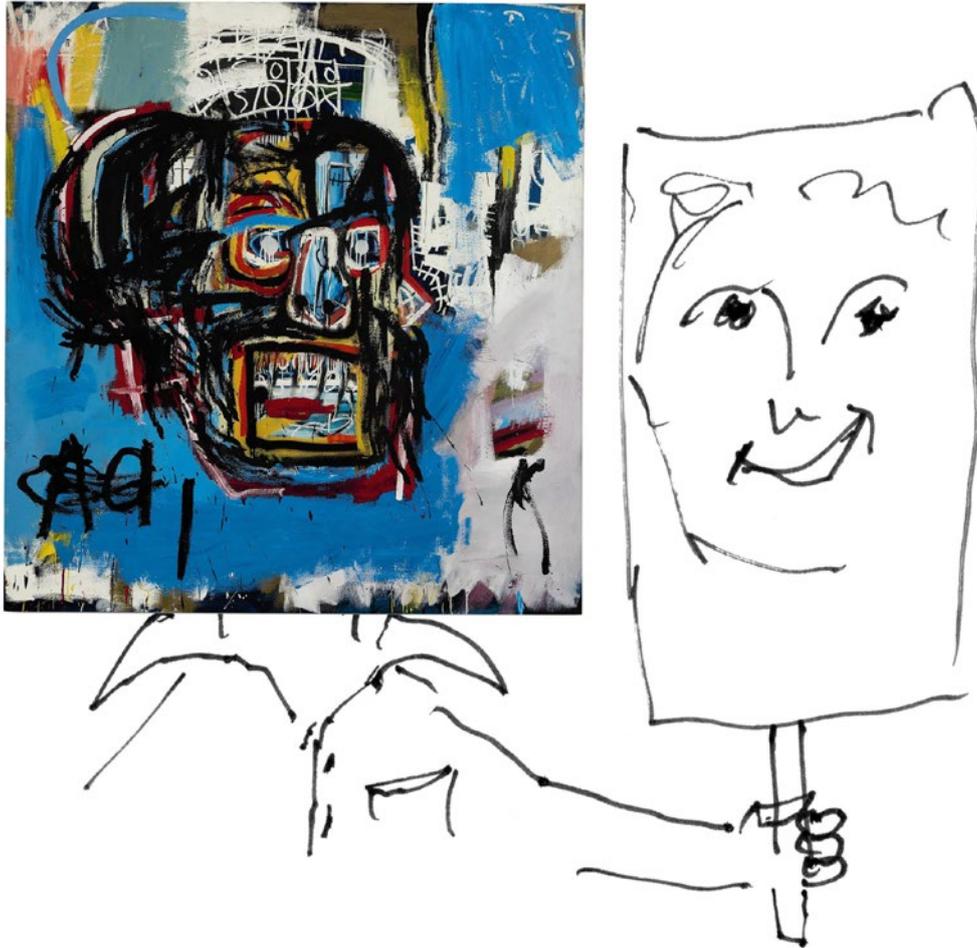

Most artists and musicians want to be in New York because it's a Mecca for music. I studied and played with different people, mostly famous Latin American singers, in nightclubs and recording studios.

I've being a seeker all my life, a seeker of the truth. As we know, everybody wants to know the truth inside. The true self needs the truth and yet that's not acknowledged out there. Like biologist Jeremy Griffith explains, everything is bullshit out there, it's fake. It's not the ideal [world]. We are not the original [cooperative, loving] self that we once were. All religions say the same thing: we lost something that is unique, a Paradise, a 'Garden of Eden'. We know that we're missing something and looking for the truth—everybody needs the truth, but they don't know where to find it. And then when I see that Jeremy is

really explaining scientifically what is happening in the psyche of the human being, it's a psychological problem that we have now, that we had to find out 'why?' 'Why?' 'Are we bad, or are we good?' We have the two sides. As I say to some friends, 'We are the Devil and we have God, together within us.' So that's a difference when we know about this information, that we discover that we are really good. Like Jeremy says, we really are the heroes of the history of humanity, because we had to gain the knowledge to get up to here in understanding what is happening in our mind and it's going to take time for humanity to understand that. But it's really worth to keep spreading the word, that all people know about this, all languages, all cultures.

I was into religion years ago and religion didn't work for me. So when I saw that Jeremy demystified 'God' and religion, I started understanding a lot of things. [The demystification of 'God' and religion is explained in [Freedom Essay 23\\*](#): *Integrative meaning or 'God'*.] He explained that religion is a dogma, it's something that's imposed. It's really something that is good, it's been good for humanity, but it's not thoroughly honest, because it makes you believe something that there's no proof of. So the demystification of 'God' that Jeremy explains, that the God that we fear is nothing more than ourselves, inside, the fear we have from the human condition. That's why we worship God and we don't want to get close to Him. Maybe we think we are dirty [bad] or we are not worthy to get close to God. But when we understand that the real problem is our mind, we start discovering fabulous things! So understanding is more than just faith or believing. It's much more because it's scientifically proved, what Jeremy says.

When we understand then we have a defence. I don't feel guilty anymore because now I understand more and [understand] what is happening in my mind, in my psychology. So I don't need really God or religion or something. I've got understanding of what the problem is with myself first and then I can try to help other people understand that. It has relieved me of a lot of culpability [guilt]. I don't feel bad anymore. I feel good because we are good and not bad! That's our original self. But everybody has a mask, the fake self, the outside; it's like a play. People pretending to have this or have that, but at the end of the day, when you are alone, sleeping with your true self, thinking about that facade, that is when you know the truth, what is true, what is fake. So in that sense I get a lot of help from this information.

Jeremy Griffith's depiction of the façade upset humans present to the world, the upset that Jean-Michael Basquiat truthfully captured in his 1982 painting, *Untitled*.

I feel really more free now. I feel a free life. I 'see the light'. I see a purpose in life more clearly because the whole universe, all universes, are all united. There's really no difference between us, we're not separate. But that's the problem, there's separation. When we understand that unity as a whole is everywhere, it's very obvious. So if we humans get more united we're going to be better.

The world's going to be in a mess [if it continues] how it is right now, and we're heading to extinction like that. If we keep going like this, we're not going to last much longer in this world and we're finished.

I'm so happy to be part of this. Very, very happy to get people to know, to hear about this. Keep reading until we grab it, until we get it. That's crucial. Yes, that's very important.

It's going to be healthy for the whole world. This information that we have from the World Transformation Movement is the only way we humans are going to have a better future and anyone interested in getting this information could contact me in New York. And I'm so happy to do this! Thank you. Have a nice day. ”
