

Praise for *FREEDOM: The End Of The Human Condition*

by Jeremy Griffith

‘I think the fastest growing realization everywhere is that humanity can’t go on the way it is going. Indeed, the great fear is we’re entering end game where we appear to have lost the race between self-destruction and self-understanding — the race to find the psychologically relieving explanation of our ‘good and evil’-stricken human condition.

WELL, ASTONISHING AS IT IS, THIS BOOK BY AUSTRALIAN BIOLOGIST JEREMY GRIFFITH PRESENTS THE 11TH HOUR BREAKTHROUGH BIOLOGICAL EXPLANATION OF THE HUMAN CONDITION NECESSARY FOR THE PSYCHOLOGICAL REHABILITATION AND TRANSFORMATION OF OUR SPECIES!

What this book of books, in fact this *greatest of all books*, does is take humanity from a state of bewilderment about the nature of human behavior and existence to a state of profound understanding of our lives — understanding that drains away all the pain, suffering, confusion and conflict from the world. This is the book we have been waiting for, it is THE BOOK THAT SAVES THE WORLD!’

PROFESSOR HARRY PROSEN,
Former President of the Canadian Psychiatric Association, and former Chair, Psychiatry Department, Medical College of Wisconsin

‘Nothing Dr. Prosen has said about the immense importance of this book is an exaggeration. This *is* the book all humans need to read for our collective wellbeing.’

DR SCOTT D. CHURCHILL,
Professor and former Chair, Psychology Department, University of Dallas

‘The sequence of discussion in *FREEDOM* is so logical and sensible, providing the necessary breakthrough in the critical issue of needing to understand ourselves.’

DR DAVID CHIVERS,
University of Cambridge anthropologist and former President of the Primate Society of Great Britain

‘This book is actually written from a position *outside* of the human condition. *It is just amazing*; Griffith walks freely through all the psychosis of our troubled human condition and with such freedom is able to explain everything about us!’

TIM MACARTNEY-SNAPE,
biologist, mountaineer and twice-honoured Order of Australia recipient

‘You never forget the moment when you realise this really does explain the human condition.’

BRIAN CARLTON,
Australian journalist, commentator and broadcaster
