The Interview

The world is in crisis! Polarised politics, conflict, corruption, failed states, refugees, rampant levels of anxiety, loneliness and depression, family breakdown, drugs, fraught younger generations, environmental devastation. What's the solution? Only the redeeming, reconciling and transforming biological understanding of the human condition can save us, and it is precisely that insight that is presented in biologist Jeremy Griffith's book FREEDOM.

"I have no doubt Jeremy Griffith's book FREEDOM provides the holy grail of insight we have sought for the psychological rehabilitation of the human race. This is the book we have been waiting for, it is the book that saves the world."

Professor Harry Prosen,
Former President of the Canadian Psychiatric Association
