The world is in crisis! Polarised politics, conflict, corruption, failed states, refugees, epidemic levels of anxiety, loneliness and mental illness, family breakdown, drugs, fraught younger generations, environmental devastation. What's the solution? Only the redeeming, reconciling and transforming biological understanding of the human condition can save us, and it is precisely that insight that is presented in biologist Jeremy Griffith’s book FREEDOM.

Historic day for humanity

Jeremy Griffith’s world-saving book FREEDOM was launched at the Royal Geographical Society in London on 2 June 2016. In an amazing dialogue, Sir Bob Geldof, who was essentially knighted for his concern for humanity, began the launch by pleading for scientists like Jeremy to save the world. Jeremy then presented that desperately needed scientific solution to the world’s problems, which is the reconciling explanation of our species’ ‘good and evil’ conflicted human condition. In the process Jeremy was also able to explain why the idealistic dogma of Sir Bob’s left-wing philosophy has actually oppressed the search for knowledge and worked against progress to enlightenment.

Watch this presentation of the launch of FREEDOM.

Read the expanded transcript of these presentations, and also a description of the transformation of the human race this explanation makes possible, in the book Transform Your Life And Save The World, which is available further up on this homepage. It provides the ideal introduction to FREEDOM.
